

your moments, your **frām**™

frām [freym] verb

1. best method for creating awesome customized iPhone case covers

frām is...

The first and only iPhone case that can be personalized with any photo in seconds using the unique integrated template.

You choose the photo and you create the case. Unlike competing products, frām does not require file uploads, special services and delays for shipping. Photos can be easily changed as often as you like.

Integrated template.

frām's crystal clear back pops out to become an integrated template, helping you easily mark and cut photos for a perfect fit every time!

Since the template is part of the case, it's always there when you need it.

Custom cases in 90 seconds.

Start with an existing photo and create your new custom case in about 90 seconds. Be creative and use other images as well; magazines, business cards, calendars, etc.

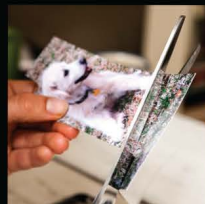

How frām works

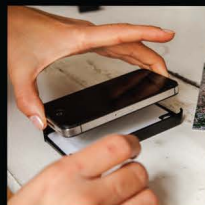

Trace

Position template and draw cut lines around the edges.

Cut

Cut along the lines. Don't worry, it's all straight cuts!

Assemble

Place template, photo and phone back into the frame.

Enjoy!

Your custom frām case is complete and ready to show.
